ELSEVIER

European Journal of Operational Research 92 (1996) 663–665

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 92

1 Queueing theory in manufacturing systems analysis and design: A classification of models for production and transfer lines (Invited review)
H.T. Papadopoulos and C. Heavey

28 Finding robust solutions for product design problems
E.M.T. Hendrix, C.J. Mecking and T.H.B. Hendriks

37 An implementation of linear and nonlinear multicommodity network flows
J. Castro and N. Nabona

54 Application of multidimensional scaling techniques to facilities layout
M.H. Safizadeh and D.R. McKenna

63 Optimal solutions for the machining economics problem with stochastically distributed tool lives
E. Iakovou, C.M. Ip and C. Koulamas

69 A model for a Mixed Continuous-Periodic Review One-Warehouse, *N*-Retailer inventory system
S.L. Ahire and C.P. Schmidt

83 On managing operating capacity to reduce congestion in service systems
K.C. So and C.S. Tang

99 Analysis of an open tandem queueing network with population constraint and constant service times
Y. Rhee and H.G. Perros

112 Analyzing $E_k \mid E_r \mid c$ queues
I.J.B.F. Adan, W.A. van de Waarsenburg and J. Wessels

125 Analysis of M/G/1 queues with delayed vacations and exhaustive service discipline
H. Li and Y. Zhu

135 Selecting the best choice in the weighted secretary problem
Y.H. Chun

148 Structural approach to parametric analysis of an IP. On the case of the right-hand side
H.-F. Wang and J.-S. Horng

157 Linear fractional goal programming in consideration of fuzzy solution
H. Ohta and T. Yamaguchi

166 Analytic efficient solution set for multi-criteria quadratic programs
C.J. Goh and X.Q. Yang

182 Binary interactions and subset choice
P.C. Fishburn and I.H. LaValle

193 Mathematical model and method of searching for a local extremum for the non-convex oriented polygons allocation problem
Yu.G. Stoyan, M.V. Novozhilova and A.V. Kartashov

211 A tight lower bound for the completion time variance problem
C.T. Ng, X. Cai and T.C.E. Cheng

214 An addendum to the hierarchical network design problem
C.W. Duin and A. Volgenant

217 OR Software, *H. Thiriez*

219 A classification of literature on determining the lot size under quantity discounts (Invited review)
W.C. Benton and S. Park

239 Exploiting timely demand information to reduce inventories
K.E. Bourland, S.G. Powell and D.F. Pyke

254 Estimating the demand distributions of single-period items having frequent stockouts
H.-S. Lau and A.H.-L. Lau

266 Economic replenishment strategies for announced price increases
R.J. Tersine
281 Production strategies for a stochastic lot-sizing problem with constant capacity
N.P. Dellaert and M.T. Melo
302 A production lot size inventory model for deteriorating items and arbitrary production and demand rates
Z.T. Balkhi and L. Benkherouf
310 Linear programming for the 0–1 quadratic knapsack problem
A. Billionnet and F. Calmels
326 Lagrangean methods for the 0–1 Quadratic Knapsack Problem
P. Michelon and L. Veilleux
342 Integer-friendly formulations for the *r*-separation problem
E. Erkut, C. ReVelle and Y. Ülküsal
352 A new procedure for identifying the frame of the convex hull of a finite collection of points in multidimensional space
J.H. Dulá and R.V. Helgason
368 Containment of a single polygon using mathematical programming
R.B. Grinde and T.M. Cavalier
387 The use of dynamic programming in genetic algorithms for permutation problems
M. Yagiura and T. Ibaraki
402 Optimizing simulated annealing schedules with genetic programming
A. Bölte and U.W. Thonemann
417 Fuzzy versus statistical linear regression
K.J. Kim, H. Moskowitz and M. Koksalan
435 OR Software, *H. Thiriez*
437 Obituary

Feature Issue: Aspects of Operational Research

441 Aspects of Operational Research: Tutorial and Research Review papers from EURO XIII/OR 36
V. Belton and D. Bouyssou
443 Model legitimisation in operational research
M. Landry, C. Banville and M. Oral
458 The development, validation and implementation of knowledge-based systems
R.M. O'Keefe and A.D. Preece
474 Extensions of coloring models for scheduling purposes
D. de Werra
493 General local search methods
M. Pirlot
512 Fuzzy linear programming and applications
H. Rommelfanger
528 Non-traditional methods of forecasting
D.W. Bunn
537 Value-focused thinking: Identifying decision opportunities and creating alternatives
R.L. Keeney
550 New Operations Research and Artificial Intelligence approaches to traffic engineering problems
M. Bielli and P. Reverberi
573 Parallel processing for difficult combinatorial optimization problems
C. Roucairol
591 The EURO Gold Medal 1994
C. Carlsson
593 The space of freedom of the decision maker. Modelling the human brain
J.-P. Brans

603 Rationality, emotion and preference change. Drama-theoretic models of choice
P. Bennett and N. Howard
615 An empirical application of the information-structures model: The Postal Authority case
N. Carmi and B. Ronen

628 A fuzzy-linguistic approach to a multi-criteria sequencing problem
G.I. Adamopoulos and C.P. Pappis
637 Fuzzy part coding for Group Technology
D. Ben-Arieh, S.E. Lee and P.T. Chang
649 Markov-type fuzzy decision processes with a discounted reward on a closed interval
M. Kurano, M. Yasuda, J.-i. Nakagami and Y. Yoshida
663 Contents Volume 92
